EXPERIENCE

Software Developer | *Corpoasia | Barinas | (18-03-2025) - (18-07-2025)*

➔ I developed a ride web application (Veep) as a team using React for the frontend and Django for the backend. I implemented a user authentication and authorization system using JWT tokens. I designed and developed a RESTful API for client-server communication. I collaborated on database design and model creation using the Django ORM and worked on implementing a websocket for real-time notification delivery.

➔ I participated in the development of a shopping assistant application (MICASA) with a product catalog and a QR code scanner. I implemented the shopping cart and order processing functionality. I used Docker to containerize the application and manage the various services.

EDUCATION

Universidad Nacional Experimental de los Llanos Occidentales Ezequiel Zamora, Barinas: *Computer Engineer*

APRIL 2019 - JULY 2025

Professional education as an engineer capable of designing, developing, implementing and managing information systems to solve computer problems.
